BRAINS VS LABOR .- The following beautiful passage is by the Rev. J. F. Corning. It will be appreciated by all "brain workers:" "While I sat at my study table with my pen in \$1, 00, 00, 000 hand, the fingers moving with tardy pace at the backon of brain, I heard right below my window, in the adjacent field, the monotonous ring of a laborers' hoe upon the corn hills. While he hoes, he whistles hour by hour till the clock strikes twelve, and then with ravenous appetite repairs to his beautiful yet simple meal, only to resume his task again and pursue it to the setting sun. As I stood at the window watching him toil, and turned again to my pen and paper, I asked myself how it happened that the man with the hoe will labor his eight or ten hours a day with less fa-tigue than the man with his pen will toil his three or four. Hugh Miller ras a great worker with the shovel and pick-would have made a good Office National Life Ivs. Co., of U. S. A hand in a slate quarry, in grading a railroad, or digging a canal. But one night, as you know, he shot himself in a fit of nervous fever. What was the difference between the great geologist and the man with the hoe whistling under my window? Simply this: the former was a worker of brain and the latter a worker of brain and the latter a worker of brain and the latter a worker of brain and set himself to study one of the stalks of corn, or the chemistry of one of those hills of soil, and very 1 kely he would soon learn what it is to lose ply this: the former was a worker of brain and the latter a worker of muscle. Let this man with a hoe lay down his husbandry for a little while and set himself to study one of the stalks of corn, or the chemistry of one of those hills of soil, and very 1 kely he would soon learn what it is to lose one's appetite and hear the clock one's appetite, and hear the clock's trike nearly all the night hours in feverish wakefulness. And thus we get at a great organic law of our being, to wit: that brain work subtracts vitality from the fountain, while muscle-work only makes draughts upon one of the ramifying istreams of life. It is estimated by scientific observers that a man will use up as much vital force in working his brains two hours

"Last year the planters had too little capital and quite limited facilities in making the crop. In view of worn out mules, plows and other instruments, and limited resources of cash and credit, if the season had been only an average one, the yield would not have exceeded, if it had reached, two million bales. But the extraordinary advantages in other respects added twenty par cent. To this set of the contains a Cartoon of the Grand Drive in the large Cartoon of the Grand Drive in the large Cartoon of the Grand Drive in the added twenty per cent, to this esti-mate. With the help of last year's crop the planters now have more mules, new implements, and more abundant provision every way for pulveriszing the soil and heightening the cultivation. Very little, if any more, surface has been planted. In-deed, many well-informed persons believe that the area devoted to this staple is less this year than last. The season thus far has been less propiti-ous on the whole, and the crop is from one to two weeks later. The question of yield is one, therefore, to be settled by future contingencies. With everything prosperous to the close of the year, the crop will reach three million bales, the improvement in cultivation giving the planters so much more from the same surface. But such uninterrupted pros-perity is hardly to be expected, how-ever much it may be desired."

apiles Sunday School Convention SATURDAY, June 12.—Just after our last report closed, the discussion of to the Church" was concluded. Rev. G. W. Sanderlin then addressed the Convention on the following subject: "The Good Superintendent." He contended that the good superinten-dent should possess the qualifications of eminent piety, enthusiasm, admin-istrative ability, and correct ideas as to the design of Sunday Schools. Mr. S. presented this subject torcibly. He is a young man, but bids fair to make his mark in his denomination.

Dr. Jeter then addressed the Convention. He urged that the good Su- responsibility of an oath to make this perintendent should possess executive grave accusation. The Indictment ability and earnestness.

After a speech by Mr. W. H. Avera the Convention adjourned, after prayer by the President.

SATURDAY AFTERNOON.

The Convention met and spent half an hour in devotional exercises, conducted by the Rev. C. J. Nelson. The subject, "The Oral Method of conducting Sunday Schools," was presented by Rev. W. B. Harrell, of Smithfield, President of the Convention.

He did not advocate the use question books in the Bible. He said that his only text book was "the Biteachers. He was listened to with great attention.

On Sunday morning at 11 o'clock, Rev. J. B. Jeter, D. D., of Richmond, Va., preached at the Baptist Church brenght a suit to recover the amount from Romans 8th Chap. 38-'39 verse. The earnest and forcible manner in which his subject "the love of God" was presented made a deep impression on the large audience.

At 8 o'clock, P. M., the Methodist and Prosbyterian Sunday Schools met with the Baptist Sunday School at the Church. The Church was crowded. The exercises of the afternoon were peculiarly adapted to the children, and consisted of singing and addresses by Rev. Messrs. Philips, Sanderlin, Jeter and Conner.

At night the Church was again filled to hear a lecture by Rev. A. D. Philips, who has been, for many years a Missionary in Africa. This lecture was full of interest and at its close a closed the Convention, and it is to be hoped that similar Conventions will be held by the several denominations in the State, and that the people may be fully aroused to the importance of bestowing more attention upon the religious training of the young of the present generation.—Raleigh Sentinel.

SPECIAL NOTICES.

General Debility is Nature's Appeal

Thousands of persons, without any spe. cific ailment, are the victims of languor and lassitude. The unthinking are apt to confound this species of inertion, with la ziness; whereas it usually arises from want of organic energy, for which the sub. jects of it are no more responsible than the near-sighted are for their defective vision Such persons, although they may be free from pain, are as truly invalids, and as much in need of medical aid, as if they were tormented with the pangs of acute disease. They require a rosic and ALTERATIVE, that will rouse and regulate their torpid organizations. In cases of this kind, HOSTET. TER'S STOMACH BITTERS produce an immediate and most favorable effect. The debilitating and desponding valetudinari. an, who feels as if he were but half alive er for business or pleasura, is metamorphos. ed, by a brief course of this most potent vegata. ble invigorant, into quite a different being. The change effected by the BITTERS, in a bod. ily and mental condition, is a surprise to himself and to his friends. He m pes no lon er; the active principle of life which seemed to have died out of him, is re-awa. kened, and he feels like a new man. Re. membering that debility is not only an af. fliction itself, but an invitation to disease, no time should be lost in fectuiting the bro. most potent of all TONICS AND NERVINES.

DEAR SIRE :- I ought to have acknowl. edged long ago the box of Pain Killer you had the goodness to send me last year. In coming was most providential. by Land Company, With a full Board of Directors, and a full corps of empetent and reliable officers we preof a brilliant future and successful

to details and to elaborate the many ask of the Legislature of North Carolina the present charter with its Hberal and benevolent provisions; anffigient to say, that one great and prom ment question kept constautly before their eyes, was, as to the best means to be adopted by which the large and profities surplus of our lamled interest could be disposed of in the shortest period of time and to the greatest advantage to our people and State .-This we may say was the main reason which led to the application, and the one most apparent to the inquisitive investigations of every carious inquiring mind. Impoverished as our people have been by the results of a terrible and digastrous war, with little else left them to call their own except their wested lands, with comparatively no market for these by the ordinary mode of conveyancing, with limited capital to supply the wants of business, the great and growing scarcity of money, and the reluctance of immigration to seek among us pleasant homes. and fertile farms, we have been induced ate. We have, we are pleased to say, ever encouragement for believing that our plan will be successful; alike remunerative to the friends of the eneprise, and beneficial to our cheritable and educational institutions by contributing as required by the obarw ton aportion of our revenues in aid of the Poor and School Funds of the The friends of this enterprise are well aware of the prejudice that has long existed in the minds of our people agelest lotteries, and in many instances not without good reason :-Appreciating therefore the difficulties with which they will necessarily for a time be called upon to contend, they have endeavoted by the selection of gentlemen of known character and integrity as officers to fill the different departments to quiet the apprehensions of the scrupulous and incredulous. In this respect at least they out now flatter themselves that they have been exceedingly fortunate in procuring the services of such old and well known citizens as Messrs. W. F. Davideon and A. H. Martin to fill the important offices of President and Treasurer. This apponnement will be at once an earnest to the public of an anxious and settled determination on the part of the company to carry out to the letter the provisions of their charter, and to discharge faithfully all trusts confided to their keeping and management. The granting of lottery powers in this State is by no means a novelty much loss an innovation upon the history of our legislation. An act was obtained appointing four Commisstopers in Wilmington in the year 1760 for the purpose of raising funds by the exercise of lottery powers, to be respended in furnishing two churches in the Psrisher of St. James and St. Phillips, in the county of New Hanover. Another act was also obtained in or about the year 1836, for the purpose of supplying the necessary funds with which to erect a Masonic Hall at Hillsboro. These enterprises were managed by, and received the approval of the most prominent and influential men of their day and time in the State. A charter therefore to enable

our people to dispose of the surplus of

their lands with greater facility and

certainty, and to convert their dead

dipital into active, available and pro-stable means, cannot be looked upon if properly managed, otherwise than

s a powerful lever in devoloping the

We desire to warh the dealers in, and consumers of souff generally, that since the war, certain tobacco manufacturers, being unable to find a market for their souffs, felt themselves obliged to counterfeit the general appearance of our packages, and imitate our Trade Marks, so that a close inspection is necessary to detect the spurious stricle from the genuine, and others going so far as to assert that a Lorillard's Bouff is no longer made? genuine, and others going so far as to assert that a Loriliard's Snuff is no longer made?

In making this publication we desire to warn the public against the impositions practiced upon them; as they are the losers thereby. It will be found upon comparison that Lorillard's shuff 's 'far ahead' of altrothers, below made of the best shock, after an original and secret process known only to ourselves, besides possessing great age, Strength and pungency, and is warranted not to contain any dangerous or deleterious substances, which cannot be said of the many worthless articles put on sale by others. The best is the cheapest in the end. A circular will always be mailed on application. In ordering piease specify if Sait Snuff (High Toast), or Fresh Snuff (Extra Scotch) is desired.
